

HoYi!™

A compact answer to your renewable energy needs!

Good things come in small packages.

Super versatile and durable, UGE's smallest wind turbine is the perfect solution for off-grid power generation. This unit is ideal for street lights, boats and marine applications, or any location where power needs to be generated on site.

Standing approximately 1 meter tall, and weighing just 40kg, assembly takes less than 30 minutes and setting the tower and foundation for installation is simple and easy.

The HoYi! starts producing energy in extremely low wind speeds and can withstand hurricanes, making it nearly maintenance free for its entire lifetime.
